

ADCET HACKATHON

Round 1: Idea Submission

Team Name:

Team Leader:

Problem Statement:

Track:

(This document should not exceed given pages. Keep the abstract short and precise.)

Problem identified:

(Describe the problem you have selected for which you are developing a solution.)

Market Research:

(Try answering these questions in this section:

Who are your customers and end-users?

What are the solutions already available in market for your problem? How is your solution better than existing solutions? What impact will your project make on the current market?)

Project Name:

Describe your solution:

Technology Stack:

(Technologies used for developing the project.)

Example: Frontend- React

Backend- Django

Database- Postgres

Innovativeness:

(Innovation aspect of the project and special features that it provides)

Show Stoppers:

(Show stoppers are obstacles and risks that may arise in the future and which may come in the way of your solution)

Prototype:

(You can add pictures of the prototype/wireframes/UI or provide a video link in which prototype is explained) (This section has maximum weightage)

Use Case Diagram/Flow Diagram:
